## **Abstracts**

Global Styrenic Polymer Packaging Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Styrenic Polymer Packaging can be defined as packaging solutions made from styrenic polymers. This polymer offers several advantages such as improved flow consistency and color stability, resistance to UV light sterilization process, gamma, and electron beams. Styrenic polymer packaging is used for manufacturing of medical devices such as containers, IV solution bags, packaging, fabrics, tubing, and multiflow devices. It also has application in other industries such as Construction, automotive, electric & electronics etc. Increasing demand for medical devices and growing number of end use applications as well as recent product innovation from leading market players are key drivers for growth of Styrenic Polymer Packaging Market. For instance, according to Statista – as of 2022, the revenue in worldwide medical devices segment is estimated at USD 435.7 billion, and the revenue is projected to show CAGR of 5.36% between 2022 & 2026 to reach to USD 536.8 billion by end of 2026. Moreover, in April 2022, Frankfurt, Germany based INEOS Styrolution unveiled new styrenic solutions for the healthcare industry. The company

introduced four new styrenic materials named, Lustran 348 for inhaler housings, auto-injectors applications, Zylar and Clearblend for transparent reservoirs, connectors, and durable transparent components, and K-Resin for filters and respiratory devices applications. Also, growing research and development activities and rising consumer goods industry in emerging economies are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, high cost associated with styrenic polymers impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Styrenic Polymer Packaging Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia-Pacific is the leading region across the world in terms of market share owing to rising demand for styrenic polymer for medical devices and growing construction sector in the region. Whereas, North America is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as presence of leading market players and rising automotive industry in the region, would create lucrative growth prospects for the Styrenic Polymer Packaging Market across the North American region.
