Abstracts

Global Subsea Multiphase Flowmeter Market is valued approximately USD XXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027.

A multiphase flowmeter used to measure the individual phase flow rates of constituent phases in a given flow for example, in gas and oil industry.

Continuous development in oil and gas industries which are developing new functionalities and developments for subsea multiphase flowmeters. Also, it provide various advantages, such as it characterize flow regimes at the wellhead and quickly detect slugging, which is the most difficult flow to measure and this can be a great factor for driving the market.

In 2020, Emerson introduced new implant software for digitalization of oil and gas multiphase flow measurement along with automation features to increase the adoption of Roxar™ 2600 Multiphase Flow Meter (MPFM) and promote boost process automation in the oil and gas industry.

High investment in installation as well as inaccurate measurements with fractional change in physical properties of oil restrict the market growth. However, growing global investment in oil and gas sector and integration of modern technology results in the growth of market in forthcoming period.

The regional analysis of Global Subsea Multiphase Flowmeter Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America has emerged has a significant market for subsea multiphase especially in U.S. An ultimate cause supporting market growth and expansion is the country's high manufacturing and consumption of oil. The oil production turnout increased by 11% from 2018 to 2019 and retains more than 17% of share in 2019.
