Global Sulfamic acid Market is valued approximately at USD 0.3 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 2.2% over the forecast period 2020-2027. Sulfamic acid is a chemically formulated, molecular compound (H_3NSO_3). It is a compound which is water-soluble and colorless in various applications. Also known as amidosulfuric acid, amidosulfonic acid, sulfamidic acid, and aminosulfonic is sulfamic acid. Sulfamates are also sulfamic acid by-products. Sulfamic acid is predominantly a predecessor for sweet-tasting mixtures. Sulfamic acid is the primary raw material for the different chemical product, which is a substantial fire retardant and herbicide for household by-products that drives regional demand. High demand in the various industrial applications and rising demand for personal care products in the market are the major factors boosting the growth of the sulfamic acid market. The personal care industry is experiencing robust growth that positively influences the market for sulfamic acids. The use of sulfamic acid in personal care products is considered healthy, and that there is an increase in demand for the product. One of the main factors contributing to consumer growth is the increased spending on cosmetic products. For instance, as per Statista, the per capita spending on color cosmetics in Brazil on an average was about \$9.5 per person in 2016 that is expected

to be valued about \$10.8 per person by 2021. Similarly, in South Korea, consumer spending on cosmetics shopping has increased to \$6.9 billion in 2016 from \$6.3 billion in 2014. However, key factors that restrict the overall growth of the sulfamic acid market are health-related concerns such as, It can also cause cancer-related and cellular level changes in health-related issues if used over an extended period of time and government regulations.

The regional analysis of global sulfamic acid market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. There is an increasing demand for sulfamic acid in the paper manufacturing and cosmetics industries in the North American region. Asia Pacific region contributes a considerable market share. In the Asia Pacific region, China is driving demand for sulfamic acid as there are several major players on the market as well as some of the medium-sized firms producing sulfamic acid. It is expected that the expanding chemical industry will drive sulfamic acid demand in the Asia Pacific region. There is a growing demand for the cosmetic products in the developed countries of North America, which in turn drives the sulfamic acid market. In the personal care industry demand for sulfamic acid has expanded market growth in Latin America.
