Global Sulphur Bentonite Market is valued approximately USD 130.38 million in 2018 and is anticipated to grow with a healthy growth rate of more than 4.3% over the forecast period 2019-2026. Sulphur Bentonite is a micronutrient used for boosting crop yields and soil quality. It is a constituent of amino acids and is also involved in metabolic functions of plants. Sulphur deficiency is a major problem found in regions such as the Asia Pacific and Latin America. Moreover, it helps in chlorophyll synthesis and is also a key element in oilseed production. It consists of 90% Sulphur and 10% Bentonite clay which is used as a binder during the manufacturing process and acts as a dispersing agent after mixing into the soil. Increasing sulphur deficiency in some of the developing regions is one of the major factors responsible for high CAGR of the market. Rising concern regarding balanced plant nutrition is the factor that offers growth opportunities. Also, rising government support towards sulphur bentonite is contributing towards growth of global Sulphur Bentonite market. Further, Sulphur Bentonite offers several benefits such as high nutrient efficiency and leads savings in nutrient, storage and application costs that regulates their demand across various regions. However, high cost of sulphur bentonite is one of the major factor that anticipated to hamper the market growth during the forecast period.

The regional analysis of global Sulphur Bentonite market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to presence of major manufacturers and consumer of sulphur
