Abstracts

Global Sunflower Seed Market is valued approximately at USD XXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2021-2027. Sunflower seeds are primarily used to promote health-conscious diet because of its increased used in the sunflower oil and sunflower-based processed food. Heavy technological breakthrough in the research and development field and increasing demand of sunflower seeds in the healthcare and food industry are factors contributing to the market growth. For instance: according to FIOSTAT, total sunflower harvested land went up to 27.37 million hectares, in the year 2019 from 26.84 million hectares, in the year 2017. However, Lack of storage space for the seeds and lack of protection from the outside environment impedes the growth of the market over the forecast period of 2021-2027. Also, growing awareness towards healthy diet and technological advancements in the market are likely to push the growth of the market in the forecast period.

The regional analysis of Global Sunflower Seed market when considering for various key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World leads to the analysis that Europe is the leading region across the world in terms of market share owing to increasing demand for sunflower oil Whereas, Asia-Pacific is anticipated to exhibit highest growth rate over the forecast period 2021-2027.
