Abstracts

Global Sunitinib malate market is valued at approximately XX in 2020 and is anticipated to grow with a healthy growth rate of more than XX over the forecast period 2021-2027. Sunitinib malate is a small-molecule medication that has been shown to block several tyrosine kinases in different receptors (RTKs). Sunitinib is recognized as an effective drug in suppressing cell proliferation and angiogenesis due to its potential antineoplastic action. Sunitinib capsules are used to treat pancreatic neuroendocrine tumors, renal cancer, and gastrointestinal stromal tumors (GIST). Sunitinib was the first cancer treatment to be licensed for two indications at the same time: renal cell carcinoma and imatinib-resistant gastrointestinal stromal tumor (GIST). The global sunitinib malate market is primarily driven by technological advancements and the rising prevalence of pancreatic cancer. Pancreatic cancer's rising prevalence is a primary driver of the worldwide sunitinib capsules market. According to the American Cancer Society, over 56,000 Americans will be diagnosed with pancreatic cancer in 2017, with over 42,000 of them anticipated to die by pancreatic cancer. Pancreatic tumors are more difficult to diagnose and remove than other tumors due to their relative inaccessibility. As a result, sunitinib malate capsules are increasingly being used to treat pancreatic cancers. However, higher cost of research and development(R&D), and high cost of sutent may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global Sunitinib malate market is considered for the key regions such as North America Asia Pacific, , Latin America, Europe, and Rest of the World (ROW). North America is the leading region across the world in terms of market

share due to rising prevalence of pancreatic cancer in the region. Whereas Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to growing awareness about pancreatic cancer in developing economies such as India, China, and others.
