## **Abstracts**

Global Surge Protection Device System Market is valued at approximately USD 2.5 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.5 % over the forecast period 2021-2027. A surge protection device is an appliance or device intended to protect electrical devices from voltage spikes in altering current circuits. SPD is designed to limit transient overvoltage of atmospheric origin and divert current waves earth, so as to limit amplitude of this overvoltage to a value that is not hazardous for the electrical installation and electric switchgear and controlgear. Growing demand for protection systems for electronic devices to fuel the Surge Protection Device System Market. Ongoing power quality issues are also propelling the market growth.

However, additional cost of installation may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global Surge Protection Device System Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World (ROW).
