Abstracts

Global Surgical Booms Market is valued approximately at USD XXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2021-2027. Surgical booms are primarily used in the operating theatre to assist other equipment and gadgets. Increasing number of operating rooms and operation theatres and increasing number of surgical operations are some factors contributing to the market growth. For instance: according to Eurostat Statistics, approximately 1.16 million caesarean sections were performed in the EU (European Union)-27, in the year 2018. However, Lack of skilled professionals and high cost involved in the surgical treatments impedes the growth of the market over the forecast period of 2021-2027. Also, increasing investments from the private players in the market and favorable government policies related to the surgical booms is likely to increase the growth of the market in the forecasting period.

The regional analysis of global surgical booms market includes Asia Pacific, North America, Europe, Latin America and Rest of the World for analysis and estimation. North America is the leading region across the world in terms of market share owing to rapid advancements in the technology. Whereas, Asia-Pacific is anticipated to exhibit highest growth rate over the forecast period 2021-2027. Factors such as increasing number of patients and increase in the number of new players in the market would create lucrative growth prospects for the Surgical Booms market across Asia-Pacific

region.
