Abstracts

Global Surgical Drapes Market is valued approximately USD 3100 million in 2019 and is anticipated to grow with a healthy growth rate of more than 3.5 % over the forecast period 2020-2027. Surgical Drapes are sterile fabrics or fabric-like materials which is used to isolate the surgical site from the rest of the body. Surgical drapes are also used to isolate the body from other sources of contamination. Also, such drapes act as a barrier against bacterial contamination in the surgical field. Also, the market is attributed to the advancements made in the healthcare sector in terms of usage of medical protective gears while performing surgeries to reduce risk of transmission of pathogens to surgeons, patients and medical personnel. The gears can be used repeatedly even after multiple washes, with a rising focus on maintaining sterility of unprepared environmental surfaces. Thus, high adoption of surgical drapes is witnessed. Also, the key players are focusing on strategies such as product launch, innovation and merger & acquisition to sustain themselves amidst fierce competition. The growth of the market is attributed owing to the increase in the number of surgical procedures and awareness regarding the spread of various infection. As per the EuroStat, the number of surgical procedures per 100 thousand inhabitants increased from 104.1 laparoscopic Appendectomy procedures in 2012 to 116.5 in 2017 in Ireland, followed by a similar increase in Austria from 49.9 procedures to 75.6 procedures. As a result, the demand and need for surgical drapes would increase as it ensures properties such as strong barrier for microorganisms and resistance and tearing as compares to reusable drapes

and gown where this performance may be depleting. However, increase in price of surgical drapes is hampering the growth of the market during the forecast period of 2020-2027.

The regional analysis of global Surgical Drapes market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region due to the increasing use of single -use surgical drapes, growing healthcare spending and strong presence of industry players in the region. Whereas Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
