Abstracts

Global Sustainable Supply Chain Finance Market is valued approximately at USD XX billion in 2019 and is anticipated to grow with a healthy growth rate of more than 18.27% over the forecast period 2020-2027. Companies are constantly working on optimizing their supply chain network to cut costs which increase their options for profitability. There is also a considerable amount of cash that gets stuck in the supply chain network. Supply chain finance model solves this issue; whereby the financial institution issues accounts receivable to the supplier with minimal fee at the earliest, and the buyer would pay the bank before the date of invoice. Rising utility in numerous industries is the driving factor in this market. According to CDP's 2019 supply chain report, 35 per cent of program members are engaged in climate change with their suppliers in 2018, up from 23 per cent the year before. 'Furthermore, as suppliers mature in their understanding of sustainability issues and advance their approaches to action, there is evidence that they are also improving their efforts to cascade positive change down through their own supply chains. Slow adoption rate is the restraining factor in this market. Companies are seeking opportunities from the adoption of sustainability practices to gain marketing and competitive advantages, increase staff retention and build credibility

The regional analysis of global Sustainable Supply Chain Finance market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Sustainable supply chain finance market in North America is forecast to witness a 19.14 per cent CAGR over the forecast period. This is mainly due to strict regulations regarding sustainable practices in the environment. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
