Global Suture Anchor Devices Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Suture anchors refers to fixation devices widely used for attaching soft tissue (such as tendons, ligaments, and meniscus) to the bone and have become essential devices in sports medicine and during arthroscopic surgery. Suture anchors are made of metal or biodegradable material (which dissolves in the body over time). Growing prevalence of sports injuries and rising R&D activities and product innovation from leading market players are key drivers for the growth of Suture Anchor Devices market. For instance, according to Johns Hopkins Medicine- As of 2020, An estimated 3.5 million sports injuries occur each year in children and teens in USA. Furthermore, more than 775,000 children, ages 14 and younger, are treated in hospital emergency rooms for sports-related injuries each year. As per National Safety Council (NSC) USA- in USA bicycle and accessory injuries, have increased to 425,910 injuries in 2020 compared to 417,485 in 2019. Moreover, in September 2020 Smith+Nephew, British multinational medical equipment manufacturing company has launched "HEALICOIL KNOTLESS" Suture Anchor. The implant is absorbed and replaced by

bone within 24 months. Furthermore, in recent events in February 2022, The Orthopaedics Company of Johnson & Johnson, DePuy Synthes has acquired CrossRoads Extremity Systems, a Tennessee, US based Medical Devices company. Also, with rising healthcare infrastructure in emerging economies and rapid advancements in Medical Equipment Technology, the adoption & demand for Suture Anchor Devices is likely to increase the market growth during the forecast period. However, high treatment cost and negative impact of covid 19 pandemic on hospital industry impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Suture Anchor Devices market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to presence of leading market players and rising technological advancements in medical equipment technologies in the region. Whereas Asia-Pacific is anticipated to exhibit highest growth rate over the forecast period 2022-2028.
