## **Abstracts**

Global T-Cell Lymphoma Market is valued at approximately USD 1588.89 million in 2021 and is anticipated to grow with a healthy growth rate of more than 8.25% over the forecast period 2022-2029. T-Cell Lymphoma is a type of blood cancer which arises in an immune system named as T-cell. The T-Cell Lymphoma market is expanding because of factors such as rise in lymphoma cancer incidence, advancements in T-cell lymphoma-specific therapies and the risk of lymphoma due to autoimmune disorders. This market is dominated by Johnson & Johnson (Janssen Pharmaceuticals Inc.), Novartis AG, Bristol Myers Squibb Company, Merck & Co. Inc., and F. Hoffmann-La Roche Ltd.

The rising number of blood cancer has increased the prevalence of T-cell lymphoma. As per the Leukemia & Lymphoma Society® (LLS), about one in three people in the United States is diagnosed with leukaemia, lymphoma, or myeloma. In 2021, a total of 186,400 people in the United States are expected to be diagnosed with leukaemia, lymphoma, or myeloma. New cases of leukaemia, lymphoma, and myeloma are expected to account for 9.8% of the estimated 1,898,160 new cancer cases diagnosed in the United States in 2021. Furthermore, the uptake of premium-priced products and immune checkpoint inhibitors as well as the launch of several novel therapies with label extensions of commercialized products are expected to increase the opportunity for this market in the forthcoming years. However, the high cost of Treatment and Adverse Side Effects of

Therapies stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global T-Cell Lymphoma Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the dominance of branded products and the region's increasing disease prevalence. According to the Globocan 2020 report, 8,506 cases of non-Hodgkin's lymphoma occurred in Canada in 2020, with 313 deaths. This is expected to increase the incidence of T-cell lymphoma in the country. Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising disease, weak immune systems, rising health awareness among the netizen and active participation of government and nonprofit organizations in the market space.
