## **Abstracts**

Global Tea Concentrate Market is valued approximately USD 17.4 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 4.47 % over the forecast period 2020-2027. Tea concentrate is an aromatic drink which is prepared by pouring hot or boiling water over the cured *Camellia sinensis* leaves. Tea contains bioactive compounds such as amino acids, proteins, flavonoids, caffeine and xanthines. Tea has a cooling, slightly bitter and astringent flavor coupled with beneficial properties essential to health. The global tea concentrate market is driven by increasing awareness of the side effects of synthetic flavors, growing clean label trends around the world, increasing demand for herbal dietary supplements, growing demand for fortified and innovative drinks, and rising per capita expenditure on processed food. The growth in tea consumption acts as a key driver of the Tea Concentrate market's growth. For Instance: According to Statista, Global tea consumption amounted to approximately 266 billion liters in 2017, which rises to 273 billion liters in 2018. However, availability of cost-effective substitutes, limited availability of raw materials, unstable prices of raw materials restrain market growth.

The regional analysis of global Tea Concentrate Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the increasing awareness of the side effects of synthetic flavors, growing clean label trends. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as increasing demand for herbal dietary supplements, growing demand for fortified and innovative drinks, and rising per capita expenditure on processed food would create lucrative growth prospects for the Tea Concentrate Market across Asia-Pacific region.
