Abstracts

Global Teeth Whitening Products Market is valued approximately at USD XX million in 2019 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2020-2027. Teeth whiteners are used by dentists in dental clinics, given for home use by dentists, or purchased over the counter. Teeth whitening materials are primarily of two kinds, i.e. Peroxide-containing bleaching products and whitening toothpaste. Bleaching agents include peroxide(s) that help to eliminate deep and surface stains. Non-bleaching chemicals, on the other side, include compounds with physical or chemical intervention that eliminate only surface stains. Growing demand for over-the-counter teeth whitening items, coupled with rising understanding of the importance of white teeth for beauty and motivation, are two of the main factors driving the market. In addition, dental endorsements and approvals for teeth whitening products from dental associations encourage consumers to use teeth whitening products. Teeth whitening devices sold by dentists and over-the-counter home-use teeth whitening bleaching items are eligible for the approval of the American Dental Association. A number of whitening products are currently available to consumers from dentists as well as retail outlets that involve paint-on fabrics, gels, bleaching labels, among others. Such goods differ by amount and type of active ingredient, formulation and shape. Growing knowledge of oral health and easy availability of teeth whitening over counter items are two of the growth drivers of the teeth whitening industry. In addition, changing lifestyles and increasing disposable incomes, leading to a shift from traditional oral care products

to new ones, are boosting this market. In addition, increased consumption of tea, cola, alcoholic beverages and tobacco that cause teeth discoloration is likely to open up opportunities for the growth of the market for teeth whitening products. The regional analysis of global Teeth Whitening Products market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. The United States is expected to dominate the teeth whitening market due to a growing tendency towards cosmetic dentistry. According to reports by the Centers for Disease Control and Prevention (CDC), 84.6 per cent of children aged 2-17 years had dental appointments in the US in 2016. With an growing geriatric population, unsanitary dietary patterns followed by beer, alcohol , cigarettes, fast food, caffeine intake, dental discoloration may have an effect on the growth of the industry in the United States.
