Abstracts

Global Telecom Mounting Hardware Market is valued at approximately USD 540 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.8 % over the forecast period 2022-2028. Telecom mounting hardware contains the components needed to complete and hold a telecom network, such as cables, cabinets, and routers, as well as the gear required to hold an antenna or a telecommunication tower in place. Antenna mounting hardware options include low-profile platform handrails, RRU mounts, and big pole backing kits. Manufacturers sell telecom mounting hardware that can be used to install concrete, wood, and steel poles. Telecom mounting hardware is available in aluminium, stainless or carbon steel, and other materials, depending on the customer's needs. Migration from 3G to LTE (Long Term Evolution), rising need for Tower Mounting for the upcoming 5th generation, and rising use of IoT (Internet of Things) have driven the adoption of Telecom Mounting Hardware across the projected period. For Instance: As per the reports, by 2025, the total installed base of Internet of Things (IoT) connected devices is estimated to reach 30.9 billion units, a significant increase from the 13.8 billion units expected in 2021. the efficiency of electrical safety testing and also reduced testing risks for products.
