Abstracts

Global Telehealth Kiosk Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Telehealth Kiosk can be defined as a standalone and private, virtual exam room. They feature video capabilities and have storage space for different electronic equipment such as stethoscopes and blood pressure monitors, SpO2 sensors etc. Telehealth Kiosk utilizes telecommunication technology to enable health care professionals to treat patients remotely. The growing digital health market and increasing demand for urgent care medical services as well as strategic initiatives from leading market players are factors that are accelerating the global market demand. For instance, according to Statista - In 2019, the worldwide digital health market was valued at USD 175 billion, and the market is projected to grow at lucrative CAGR of around 25 percent from 2019 to 2025, to reach to USD 660 billion by 2025. Furthermore, leading market players are working towards strategic initiatives such as collaborations and new kiosk installations to capitalize the growing demand for telehealth services. For instance, in September 2021, Singapore-based Fullerton Health, an enterprise healthcare solutions provider launched a telemedicine kiosk to support Singapore's migrant workers. Fullerton DigiHealth Kiosk offers telemedicine with automated vending of medicines. Users can register for teleconsultation by tapping their work pass on the kiosk. This new kiosk also facilitates video call with a doctor for medication. The medicines can be automatically dispensed, and the machine also offers printing of

medical certification, receipts and referral letters. Moreover, in April 2022 Norwalk, Connecticut, USA based Telehealth platform Docty announced to set up 100 digital health kiosks across Indian states of Telangana, Andhra-Pradesh and Maharashtra. Also, growing digitization in healthcare industry as well as rising healthcare spending in emerging markets are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, a high cost of deployment and maintenance associated with Telehealth Kiosks limit the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Telehealth Kiosk Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing penetration of digital healthcare services and presence of leading telehealth care service providers in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as rising healthcare spending and growing digitization in the region, would create lucrative growth prospects for the global Telehealth Kiosk Market across the Asia Pacific region.
