Abstracts

Global Teleoperation and Telerobotics Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Teleoperations, also called telerobotics, is the technical term for the remote control of a robot. Signals are sent to the robot to control it; other signals come back, telling the operator that the robot has followed the instructions. The rising investment in artificial intelligence and rising smart vehicles adoption has led to the adoption of Teleoperation and Telerobotics across the forecast period. For Instance: NITI Aayog has published a working paper on AI in June 2018; defining India's planned approach towards AI. Investment in AI startups in India has grown to US\$ 73 million in 2017 from US\$ 44 million in the previous year. Also, with the technological advancements, the adoption & demand for Teleoperation and Telerobotics is likely to increase the market growth during the forecast period. However, lack of skilled professionals impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Teleoperation and Telerobotics Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World.
