Abstracts

Global Telerehabilitation Services Market is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2021-2027. Telerehabilitation offers a wide range of clinical applications, including assistive technology, teleconsultation with a psychiatrist, and remote therapy with tools, among others. Telerehabilitation services are required for assessment, monitoring, consultations, diagnosis, and management of therapies, as well as the recommendation of interactive therapies or therapeutic venues. During the forecast period, the market is projected to be driven by the development of novel systems for offering rehabilitation services. For example, PT Genie, a digital health business, launched PT Genie, a wearable gadget that allows patients to communicate with their physical therapist remotely, in July 2019. To verify that the exercise routine is helping the patient heal, PT Genie gives real-time feedback and maintains a continuous link between the patient and the therapist. Similarly, Novacare opened seven rehabilitation centres across the United States, making it the country's largest outpatient rehab provider. Furthermore, Cowper's Mobility Center in Penrith relocated to a larger facility in August 2019 in order to provide a wider range of rehabilitation products and services following a patient's hospital discharge, as well as educate patients about rehabilitation products and provide guidance on mobility issues. Reflexion Health, Inc., for example, announced the debut of two digital rehabilitation solutions in March 2018: the VERAHome for post-acute care physical therapy patients

and the VERAClinic for their physicians. However, limited awareness and lack of skilled professionals in developing countries may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global Telerehabilitation Services Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World (ROW). North America is the leading region across the world in terms of market share due to the presence of a large number of key players in the region. Whereas Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027 due to increase in the geriatric population across the region.

Major market player included in this report are:

MTI America
UnaliWear Inc
Virtual Physical Therapists
Conversa Health
Rehab Management Pty Ltd
MindStreet Inc.
