## **Abstracts**

Global Temperature Sensor Market to reach USD 7.75 Billion by 2027.

Global Temperature sensor Market is valued approximately at USD 5.66 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 4.6% over the forecast period 2021-2027. A temperature sensor is a device used to measure and control temperature. This can be air temperature, metal temperature, liquid temperature or temperature of solid matter.. The global Temperature Sensor market is being driven

by increasing penetration of temperature sensors in advanced & portable healthcare equipment, growing demand for temperature sensors in automotive sector, as there is a growing demand for accurate temperature sensors for applications such as engine coolant temperature management, outside air temperature management, active in-vehicle temperature management. Furthermore, increase in rise in automotive industry, will provide new opportunities for the global Temperature Sensor industry. For instance, according to the source of statista, there has been rise in sales of cars worldwide, in year 2020 the sales reached to 63.8 million units which increases to 71.4 million units in year 2021. As a result, increased automotive industry will necessitate the use of temperature sensors in the manufacturing of different automobile parts, which will serve as a catalyst for the Temperature Sensor industry in the future. However, high initial cost involved in advanced sensors, may impede market growth over the forecast period of 2021-2027.
