## **Abstracts**

Global Testing, Inspection, & Certification Market is valued approximately at USD 318.7 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 3.8% over the forecast period 2021-2027. The testing, Inspection and Certification sector consists of assessment bodies that provide services ranging from auditing and inspection, to testing, verification, quality assurance and certification. The sector includes both in house and outsourced services. Increasing number of merger and expansion strategies is augmenting the growth of the market. For example, in August 2020, ALS began offering wastewater testing and analysis. The increasing trend of outsourcing of TIC services to third party specialist is widely adopted by both private and government agencies. This is also growing the market in the forecasted period. With increasing globalization in trades and business, distinct regulations and standards are likely to restrain the market and create barriers for the acceptance of products internationally. This creates conflict between the local and international standards thereby restraining the market growth. Also, various regulatory standards in different nations lead to discrepancies in tax rates, thereby hindering the market growth. The shift from developed countries to the global smaller economies will give the opportunity to the market. Also, penetration of technology has brought numerous changes in day-to-day operations and activities for personal and professional uses. This incredible pace of technology will give opportunities.

The key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World are considered for the regional analysis of global Testing, Inspection, & Certification market. Asia Pacific dominated the global market in 2020 with a revenue share of 31.8% because of rising economic development in countries such as China, India, Japan and South Korea. This leads to increase in the industrial and manufacturing activity in the region, thereby offering growth opportunities to the TIC market. Europe is expected to grow substantially in the forecast period. Presence of various fashion brands, consumer goods and retail corporations in countries such as Germany and France facilitate the development and growth of the regional market.
