Abstracts

Global Textile Dyes Market is valued at approximately USD 10.61 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.60% over the forecast period 2022-2028. Textile dyes are coloring chemicals or pigments used to give textiles a specific appearance. Fibers such as wool, nylon, cotton, viscose, polyester, acrylic, and many others are colored by the usage of these dyes. The thriving growth of the textiles & apparel industry, the rising trend for better home decor and aesthetics, coupled with the low manufacturing cost in emerging regions are major factors propelling the growth of the global market. For instance, as per the Indian Brand Equity Foundation (IBEF), the Indian textile and apparel export sector accounted for USD 30 billion in 2020 and is expected to reach USD 65 billion by the year 2026. Therefore, the rising demand for textile and apparel worldwide is stimulating the demand for textile dyes, which, in turn, augment the market growth across the globe. However, stringent environmental regulations regarding the disposal of textile effluents impede the growth of the market over the forecast period of 2022-2028. Also, renewed interest in low-VOC and eco-friendly products and increasing adoption of biodegradable materials for textile manufacturing are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Textile Dyes Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia-Pacific is the leading region across the world in terms of market share owing to the flourishing development of the textile and apparel sector and the availability of cheap labor. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast

period 2022-2028. Factors such as the increasing population, as well as, less stringent regulations, would create lucrative growth prospects for the Textile Dyes Market across the Asia-Pacific region.
