Global Thermos Bottle Market is valued approximately USD 4.67 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.60% over the forecast period 2022-2029. Thermos Bottle refers to insulating storage vessel that lengthens the time over which its contents remain hotter or cooler than the flask's surroundings. Moreover, these bottles maintain hot liquids hot and cold liquids cold for long hours. It consists of a glass vessel with double walls. The glass vessel is covered with the help of an outer cover of plastic or metal to offer protection against damage. Also, the space between the walls is vacuum which reduces the heat loss due to conduction and convection. The increasing growth of travel and tourism activities in the post covid era and growing penetration of BPA free water bottles are key factors driving the market growth.

The increasing growth of travel and touristic activities in the post covid era is contributing towards the growth of the Global Thermos Bottle Market. For instance – as of 2023, the revenue in the Travel & Tourism market is estimated at USD 854.80 billion and the revenue is projected to show an annual growth rate of 4.41% between 2023 and 2027, to reach to market volume of USD 1,016.00 billion by 2027. Also, growing preference towards leisure and sports activities and rising adoption of online distribution platforms would create lucrative growth prospectus for the market over the forecast period. However, the high cost of Thermos Bottle stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Thermos Bottle Market study includes Asia

Pacific, North America, Europe, Latin America, and Rest of the World.
