Global Thrombectomy Devices Market is valued at approximately USD 1.4 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 7.1% over the forecast period 2022-2028. Devices for thrombectomy are intended to prevent blood artery injury during surgery and limit blood loss. Acute myocardial infarction, peripheral artery disease, deep vein thrombosis, pulmonary embolism, and neurovascular thrombosis disorders are all treated with these devices. The market is driven by significant factors such as increased awareness regarding early diagnosis of diseases and technological advancements in medical devices used for capturing blood clots. For instance, in 2021, NeuroVasv announced the development of the ENVI-SR Mechanical Thrombectomy System (ENVI-SR), a stent-retriever for the removal of blood clots in patients with acute ischemic stroke caused by major artery obstruction. Meanwhile, more innovative devices becoming approved fuels market expansion. For instance, the AlphaVac mechanical thrombectomy system, an off-circuit, multi-purpose mechanical aspiration thrombectomy device, was approved by the U.S. Food and Drug Administration (FDA) in January 2021. It is used to remove thrombi or emboli from the vascular non-surgically. Moreover, increasing Number of research activities in the field

of thrombectomy and expanding application of ultrasound in vascular treatment creates lucrative opportunities in the upcoming years. However, High Cost and difficultly use of devices for complex morphologies impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Thrombectomy Devices Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is leading the overall market share revenue owing to increasing burden of cardiac patients, technological advancements in the devices. However, Asia Pacific expected to be the fastest growing region due to increase in government insurance coverage in developing countries, rise in approval of new innovative embolization.
