Abstracts

Global Thrombectomy Devices Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Thrombectomy device is an intracoronary catheter with central aspiration lumen which is used in thrombus extraction. These are majorly used for minimizing the damage caused to blood vessels during surgical procedures and reducing blood loss. Thrombectomy devices have major applications in the treatment of acute myocardial infarctions, peripheral arterial diseases, deep vein thrombosis, pulmonary embolism, and neurovascular thrombosis conditions. The market has experienced lucrative growth owing to the rising geriatric population in the forecast period. According to the World Bank in 2020, globally, the percentage of geriatric population above 65 is rising rapidly. In 2020 approximately 9.321 % population across the globe ages 65 and above. Also, in 2017 the percentage of geriatric population was about 8.648 % which increased rapidly and reached approximately 8.876 % by 2018. Whereas, in 2019 the global geriatric population ages 65 and above reached 9.102 %. The rising number of surgical centers and hospitals is another major factor surging the market growth. Whereas, rising demand for minimally invasive thrombectomy procedures and favorable growth activities by market players are other major factors boosting the market growth. However, the stringent government regulations impede market growth.

The key regions considered for the global Thrombectomy Devices market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market owing to the growing healthcare facilities, rising prevalence of neurological disorders, and growing number of thrombectomy devices. Whereas, Asia Pacific is projected to register the highest CAGR in the forecast period owing to the factors such as rising geriatric population, growing government insurance coverage and rising approval of new innovation embolization and thrombectomy products.
