Global Thrombectomy Devices Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2029. Thrombectomy devices have high-resolution video recordings, better image features, and a nice texture. It has major advantages in entertainment, consumer electronics, digital cinema, and other fields. The market for Thrombectomy Devices is growing because of factors such as rising incidences of cardiovascular diseases and growing adoption of minimally invasive procedures.

According to the World Health Organization (WHO), around 17 million deaths take place with the rising prevalence of the cardiovascular disease across the globe. Whereas as rising number of hospitals and surgical centers and the growing geriatric population across the globe create lucrative opportunities for the market. However, a lack of awareness regarding peripheral artery diseases hampers the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Thrombectomy Devices Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America dominated the market in terms of revenue, owing to the increasing incidences

of neurological disorders, rising approval of thrombectomy devices, growing surgical procedures, and so on. Whereas Asia Pacific is deemed as the fastest growing region in terms of highest CAGR owing to the growing geriatric population, rising government insurance coverage in developing economies in the forecast period.
