Abstracts

Global Titanium Dioxide Market is valued approximately at USD 19.7 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.9% over the forecast period 2021-2027. Titanium Dioxide (TiO₂) is an inorganic substance with the chemical formula TiO₂ that is white in colour and non-toxic. Titanium dioxide is a fine white powder that produces a bright white colour when mixed with water. Titanium dioxide can be found in two different forms. The first kind, pigment grade titanium dioxide, accounting for over 98 percent of total output. An ultrafine titanium dioxide product is another kind of titanium dioxide. Because titanium dioxide has UV-resistant properties, it is commonly utilized in the manufacture of sunscreens. The combination is also utilized as a pigment by a variety of sectors, including food, cosmetics, paint & coating, plastic and skincare, due to its ultra-white colour and light-scattering properties. Titanium dioxide market is driven by surging demand for lightweight vehicles and booming construction sector worldwide. For instance, China plans to invest USD 1.43 trillion in key development projects over the next five years, through 2025. Shanghai's program requires for a total investment of USD 38.7 billion over the next three years, while Guangzhou has signed 16 new infrastructure projects for USD 8.09 billion, according to the National Development and Reform Commission (NDRC). Furthermore, the construction phase value in April 2021 grew by 9.8% over April 2020, according to the US Census Bureau. China, India, and other Southeast Asian nations are the hub of building activity in the APAC region, which is the largest market for the construction sector. Rapid urbanization and industrialization, rising purchasing power parity (PPP), a high standard of living, and rising disposable income all contribute to the construction industry's development. However, stringent environmental policies of governments

regarding production of titanium dioxide may impede market growth over the forecast period of 2021-2027.

Titanium Dioxide market is dominating by APAC followed by North America and Europe due to increasing investments in infrastructure development projects, increasing urbanization, rising living standards, and a booming automotive sector, as well as significant economic growth. China and India's economies are growing, attracting new investments from global manufacturers. APAC is the largest market for paints and coatings, owing to China's and India's growing populations and fast urbanization.
