Abstracts

Global Transcatheter Heart Valve Replacement Market is valued at approximately USD xyz billion in 2021 and is anticipated to grow with a healthy growth rate of more than 12% over the forecast period 2021-2027. Transcatheter heart valve replacement is a minimally invasive cardiac operation that replaces a thickened heart valve (Aortic or Mitral) that can no longer fully open. Aortic or mitral valve stenosis can be treated with transcatheter heart valve replacement. When the heart's valves thicken and become rigid, it's called aortic or mitral valve stenosis (calcifies). As a result, the valve is unable to fully open, limiting blood flow to the body. Increasing demand for minimally invasive procedures, reduced recovery time, higher survival rates and rising number of patients with valvular heart disease have driven the adoption of Transcatheter Heart Valve Replacement across the projected period. For Instance: More than 5% of the global population over the age of 65 is at risk of developing valvular heart disease, with 50% of heart patients dying if their heart valve is not replaced or repaired. Also, rising advancements in surgical procedures, rising manufacturers' interests and rising market share are most likely to boost the overall growth of the Transcatheter Heart Valve Replacement market. However, risk associated with the replacement of valve and its slipping and high risk of Blood Vessel Tearing can obstruct the market's expansion over

the projection period of 2021-2027

The key regions considered for the global Transcatheter Heart Valve Replacement market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading region across the world. Presence of major key players and rising technological advancements is driving the market growth in Europe. Whereas, Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027. The market is expected to grow during the projected period, due to rising disposable income of consumers.
