## **Abstracts**

Global Treadmill Ergometer Market is valued approximately USD 2.90 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.2% over the forecast period 2021-2027. Increasing demand of electric exercise equipment and increasing prevalence of cardiovascular and heart illnesses worldwide are factors contributing to the market growth. For instance: according to National Cancer Institute, the number of cancer patients is expected to rise to 29.5 million cases, by the year 2040 from 18.1 million cases, in the year 2018. Thus, an increased acceptance of cardiac fitness among the younger growth is attributed in an increase in demand for treadmill ergometers, which is projected to increase in the near future. However, increased competition from existing and new industries and increasing demand towards natural exercise activities such as aerobics, yoga, and Zumba impedes the growth of the market over the forecast period of 2021-2027. Also, increasing advancements in technology, increased work-life pressure and increasing demand from the fitness and healthcare industries is likely to increase the growth of the market in the forecasting period.

The regional analysis of global Treadmill Ergometer market includes Asia Pacific, North America, Europe, Latin America and Rest of the World for analysis and estimation, North America is a significant region in terms of market share across the world owing to increasing awareness towards healthy lifestyle. Whereas, Asia Pacific is anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as increasing number of well-established health industries would create lucrative growth prospects for the Treadmill Ergometer market across Asia Pacific region.
