## Abstracts

Global Tree Grate Market is valued approximately XXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XXX over the forecast period 2021-2027. Tree grate is a metallic equipment used to create a barrier around the tree for the protection of the soil and roots. Tree grates are presented using attractive color metals that matches according to the color of street. Rising attention towards the protection of soil serves as key driver for Tree Grate Market. Expansion and growth of metal industry serves as another driver for the market. According to a survey, from 2015-16 to 2019-20, different afforestation operations, including tree planting, were carried out throughout an area of 8.49 million hectares under various Central Government projects, including 0.14 million hectares under the mission in India. Rising expenditure in research and development for maintaining health of tree as well as soil serves as another driving factor for the market. According to UNESCO, global spending on R&D has reached a record high of almost US\$ 1.7 trillion. However, fluctuations in the prices of raw material and rust property of iron are estimated to impede the growth of the market over the forecast period of 2021-2027. Also, increasing interest in landscaping, surging globalization and urbanization and expansion in the number of commercial properties is likely to rise the market growth during the forecast period.

The regional analysis of global Tree Grate Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading region across the world in terms of market share owing to rise in the number of local parks especially in the developing economies like India, China, Japan, Indonesia, Malaysia and Thailand. Whereas, North America is also anticipated to exhibit highest growth rate over the forecast period 2021-2027. Factors such as increasing investment in development for trees protection would create lucrative growth
