## **Abstracts**

Global Tube Packaging Market is valued at approximately USD 9.5 Billion in 2021 and is anticipated to grow with a healthy growth rate of more than 6.6% over the forecast period 2022-2028. A tube is a foldable package that can be used for viscid liquids such as caulk, & ointments, edible sauces, toothpaste, adhesive, artist's paint, and many others. A tube is a cylindrical, hollow piece with an oval or round shape, which is manufactured by the usage of aluminum, paperboard, plastic, or further metal. Consequentially, tube packaging is more convenient, flexible, extends the shelf life of the product, offers precise dispensing of goods, and also it safeguards products from sunlight, microorganisms, oxygen, and other external sources. Thus, the growing demand for flexible packaging, rising demand for the excellent barrier properties in packaging materials, increasing expenditure on cosmetics & personal care goods. and constant developments in packaging technology are the chief impelling factors for the market growth. According to Deals On Health, women nearly spend USD 313 monthly on beauty products, along the global beauty industry is accounted for USD 511 billion in 2021. Hence, the rising spending by the population on beauty products is further boosting the market demand in the approaching years. However, the execution of stringent government regulations impedes the growth of the market over the forecast period of 2022-2028. Also, the emergence of paper-based tube packaging and the growth of bioplastic-based packaging are anticipated to act as catalyzing factors for the market demand during the forecast period.
