Abstracts

Global Turbidimeter Market is valued approximately at USD 960 Million in 2019 and is anticipated to grow with a healthy growth rate of more than 6.00% over the forecast period 2020-2027. Turbidimeter is an essential technology used to assess the relative clarity of water. The level of haziness and cloudiness in water is a fundamental indicator of water quality. The turbidity analysis is gaining significant acceptance across various end use industries such as wastewater treatment, chemical and pulp & paper etc. as it is a simple indicator of the overall quality of water as compared to other testing equipment. The rapid growth in water & wastewater industries across the globe and commendable application of turbidimeter to analyze water quality and indicate level of contamination is the factor escalating the growth of market over the forecast years. For instance: according to the Statista, the global industrial wastewater treatment industry in 2018 was USD 10.6 Million and is projected to grow with USD 15 Million by 2024. According to the International Wastewater Organization, the wastewater flow rate in Aqaba is also estimated to be 61,000 m³ /day by 2030 and the treatment capacity is expected to increase by around 70,000 m³ /day. More than 12,000 m³ / day wastewater treatment capability in Bangkok is also initiated by 2030. In addition, growing demand from paper & pulp industry and food & beverage industry is propelling the growth of market over the forecast years. However, functional limitations and presence of alternate automated integrated solutions in the industry of turbidimeter is restraining the market growth.

The regional analysis of the global Turbidimeter market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the rapid growth in water & wastewater industry. Whereas Asia-Pacific is also anticipated to exhibit the highest growth rate / CAGR over the forecast period 2020-2027. Factors such as growing demand from food & beverage industry is creating a lucrative opportunity for the growth of the cancer vaccine market in the Asia-Pacific region.
