Abstracts

Global Turret System Market is valued approximately at USD 2.5 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 6.86% over the forecast period 2021-2027. The turret system consists of a turret assembly that is incorporated into a vessel and permanently attached to the seabed through a mooring system. The turret system includes a bearing system that allows the ship to spin around the turret's permanent geostatic component, which is connected to the mooring system. The turret system makes use of bearing technology to allow a vessel to rotate around the turret's geostatic component. Depending on the hull construction of the vessel, the turret system can be connected to the interior or exterior area. Turret systems can be employed on land, in the water, or in the air. The market is driven by Increasing Demand for turret gun systems from military forces of different countries and rise in adoption of Unmanned Turret Systems by Defense forces across the globe. For instance, the unmanned turret systems are equipped with cutting-edge technology such as artificial intelligence and machine learning, which improve their operational efficiency. Armed forces can handle weapons remotely with the use of unmanned turret systems, avoiding any casualties by exposing their army personnel directly, which assists their installations across a variety of land, air, and sea-based vehicles. For instance, Rafael Advanced Defense Systems Ltd. created a new unmanned turret for Singapore's modern armored fighting vehicle, the Next Generation armored fighting vehicle (NGAFV), which was deployed in March 2019. In addition, in June 2019, the Tizona 30mm unmanned turret, designed by Navantia, EXPAL, and Elbit Systems for the Spanish Army's 808 Wheeled Combat Vehicle programme, was publicly revealed. However, Occurrence of Mechanical, Electrical, and Other Failures in Turret Systems,

may impede market growth over the forecast period of 2021-2027.

North America is dominating the turret market in terms of revenue. In which, the United States dominates the region driven by the country's commitment to integrating cutting-edge military technology. Furthermore, Asia-Pacific is projected to have significant growth throughout the projection period. Rising military spending in India and China, as well as an emphasis on expanding the capabilities of space and naval combat systems, are supporting this expansion.
