Abstracts

Global Two-Wheeler Lead Acid Batteries Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. A secondary cell, or rechargeable battery, is a lead-acid battery. It is quite popular in automobiles and trucks. In a sulfuric acid solution, it comprises lead and lead (IV) oxide plates. Lead-acid batteries are the most affordable rechargeable batteries and have a high-power output. The increasing investment in electric vehicle market and large scale demand for two-wheelers in developing nations has led to the adoption of Two-Wheeler Lead Acid Batteries across the forecast period. For Instance: as per the Avenue Capitals, the electric vehicle (EV) market is estimated to be a Rs 50,000 crore (US\$ 7.09 billion) opportunity in India by 2025, with two- and three-wheelers expected to drive higher electrification of the vehicles in the medium term. Also, with the trend of micro-mobility and indulging in recreational activities such as country-side riding, the adoption & demand for Two-Wheeler Lead Acid Batteries is likely to increase the market growth during the forecast period. However, presence of counterfeit products and preference for lithium-ion batteries impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Two-Wheeler Lead Acid Batteries Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading region across the world in terms of market share owing to the large-scale production of two-wheelers in China and Japan. Whereas, Europe is also anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as the presence of major players in this region would create lucrative
