Global Ultra-Low Temperature Freezer Market is valued approximately at USD XX Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 3.9% over the forecast period 2021-2027. Ultra-Low Temperature Freezers have the temperature capacity limit of - 45°C to - 86°C and the inner volume is in between 300 and 800 liters generally. These freezers are mainly used by the research companies for storage of drugs, chemicals, enzymes, bacteria, viruses, cell preparations, and others. The global Ultra-Low Temperature Freezer market is being driven by increasing prevalence of infectious diseases as these freezers are needed to protect infections to spread further and store for research studies. For instance, according to the healthdata.org, in 2019, 6 infectious diseases were among the top 10 causes of DALYs in children younger than ten years. The other driving factor is the increase in strategies adopted by private companies. For instance, in May 2021, Caris Life Sciences®, collaborated with Sidney Kimmel Cancer Center – Jefferson Health (SKCC) to work together in advance comprehensive cancer profiling for developing precision medicine. Furthermore, increase in favorable government initiatives for the manufacturing industry, enhancing electronics industry, growing demand for chemicals and increasing technological advancements will provide new opportunities for the global Ultra-Low Temperature Freezer industry. However, high cost of these freezers may impede market growth over the forecast period of 2021-2027.

The key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World are analyzed for regional analysis of global Ultra-Low Temperature Freezer Market. North America is the leading region across the world in terms of market share owing to presence of large number of biobanks and biotechnology companies along with high adoption of technologically advanced products. Whereas Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2021-2027 due to growing production of medicines & pharmaceutical ingredients, favorable government policies to promote research activities and growth in storage & preservation facilities in the region.
