Abstracts

Global unmanned electronic warfare market is valued approximately at USD 656.8 million in 2020 and is anticipated to grow with a healthy growth rate of about 4.3% over the forecast period 2021-2027. Unmanned electronic warfare refers to the use of directed energy or electromagnetic spectrum to attack an enemy, impede enemy assaults or control the spectrum by unmanned systems. Unmanned electronic warfare can target radar, communication, or other assets and can be applied from sea, land, or from air. The global unmanned electronic warfare market is being driven by rising popularity of modern warfare methods and increased acquisition of unmanned warfare systems due to rising transnational and regional insecurity. Furthermore, technological advancements in warfare systems will provide new opportunities for the global unmanned electronic warfare industry. Also, increasing popularity of unmanned aerial vehicles is expected to supplement the market growth. For instance, as per Statista, the unmanned aerial vehicle market across the globe is expected to increase from USD 25.59 billion in 2018 to USD 70.28 billion by 2029. This is likely to fuel the market growth. However, concerns over error possibilities in complex combat situations may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global unmanned electronic warfare is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America accounts for the largest share in terms of market revenue in the global market and is anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as rising focus on investments in the unmanned electronic warfare technologies by countries such as United States and Canada contributes towards the largest market share of North American region. Also, rise in defense related expenditure as well as geopolitical tensions are expected to propel the demand for unmanned electronic warfare in the region in the forecast years.
