## **Abstracts**

Global Urethral Dilators Market is valued at approximately USD 218.71 million in 2021 and is anticipated to grow with a healthy growth rate of more than 5.5% over the forecast period 2022-2029. When the urethra is constricted, making it difficult for urine to pass, urethral dilators are frequently used as a treatment. The Urethral Dilators market is expanding because of factors such as rising incidence of chronic kidney diseases, increasing number of patients suffering from urethral strictures and MEAtal Stenosis, and the rapidly increasing baby boomer population.

The disorder known as UI is very prevalent all across the world. A study that was published in the NCBI found that between 32.0% and 64.0% of pregnant women had urine incontinence. As a result, the need for urethral dilators for post-operative convenience has increased due to the rising incidence of urological dysfunctions. This is anticipated to have a favourable effect on industry growth. According to the National Kidney Foundation, every year more than 10% of the world population is affected by kidney chronic disease. Thus, high prevalence of CKD in the region is catering to the growth of the market. Furthermore, using Urethral dilators with pressure gauge, electroscopic arrangement, and stopcock, is creating new opportunities for the market. However, low success rate of urethral dilation may impede the growth of market.

The key regions considered for the Global Urethral Dilators Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. Due to the increased prevalence of disorders such as bladder blockage, UI, benign prostate hyperplasia (BPH), urine retention, and bladder cancer, North America dominated the market in terms of revenue. Due to factors like the prevalence of a sizable population suffering from kidney and other urological disorders, advancements in medical facilities, and the accessibility of insurance policies, Asia Pacific is predicted to develop significantly during the projected period.
