Global Urology Devices Market is valued approximately USD XXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XXX% over the forecast period 2022-2029. Various urological disorders such urolithiasis, urethral malignancies, bladder disorders, and kidney diseases can be treated and diagnosed with the help of urology devices. It includes a wide range of consumables, such sheaths, dilators, and catheters. These devices, are used to identify disorders of the bladder and urethra, include urodynamic systems, urology robotic systems, laser and lithotripsy devices, cystoscopes, and ureteroscopes. The key factors driving the market growth are rising prevalence of kidney disorders, and rising preference for minimally invasive procedures, which create the lucrative demand for the market during forecast period.

For instance, According to USRDS Coordinating Center (CC), 14.9% of the adult population in the United States that were surveyed during 2015 and 2018 had chronic kidney disease (CKD) based on a low eGFR or proteinuria (on a single examination). Additionally, another factor driving the market growth is the rising number of hospitals and investments in laparoscopy and endoscopy facilities. For instance, in 2021, Fairfield General Hospital launched a new Greater Manchester Endoscopy Modular Facility in

Bury. The facility was specially commissioned by Greater Manchester Health and Social Care Collaboration to assist the delivery of endoscopy services after the pandemic disruption. The market for urology devices like endoscopes and endovision systems for efficient treatment and care of urological conditions is anticipated to grow as a result of such investments by hospitals in the acquiring of advanced instruments, the expansion of facilities, and the establishment of new facilities. Also, increasing research & development activities would create the lucrative opportunities for the market during forecast period. However, the high cost of Urology Devices stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Urology Devices Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the dominating region across the world in terms of market share, owing to the rising number of kidney disease patients, increase in patient visits for treatment and diagnostic. Whereas, Asia Pacific is also anticipated to exhibit highest growth rate over the forecast period, owing to factors such as rising prevalence of urological conditions and growing number of hospitals and investments in the region of would create lucrative growth prospects for the Urology Devices market across Asia Pacific region.
