Global UV Stabilized Films Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The UV-protected polyester films offer weathering resistance and very high absorption of UV rays. UV films show a high transmission in the visible and almost no transmission in the ultraviolet light region. Growing consumption of packaged

food products and rising advancements in agriculture sector are key drivers for the growth of UV Stabilized Films market. For instance, according to global database management company Statista- as of 2019 the global market value of food packaging was estimated at USD 305 billion and as per projections by the year 2026 the total market volume would reach to USD 455 billion. Recently, in March 2021, Terphane, an US based leader in PET (polyester) films has partnered with Mann-Pak, an US based Packaging and Containers company, to develop dual ovenable films for packaging applications. Also, with the increasing demand from end use industries and growing R&D in field of agriculture technology, the adoption & demand for UV Stabilized Films is likely to increase the market growth during the forecast period. However, environmental concern towards use of plastic and supply chain disruptions due to pandemic restrictions impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global UV Stabilized Films Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to increasing demand for the end-use applications in the region and presence of leading market players in the region. Whereas, Asia-Pacific is anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such increasing demand for the product from countries such as presence of well-established agriculture industry and increasing penetration of leading market players in the region would create lucrative growth prospects for the UV Stabilized Films Market across Asia-Pacific region.
