Abstracts

Global UV Sterilizer Pouch Market is valued approximately at USD 100.76 million in 2020 and is anticipated to grow with a healthy growth rate of more than 10.4% over the forecast period 2021-2027. UV sterilizer pouches are used to disinfect household items through LED (Light Emitting Diode) UV band fitted in these pouches. Growing need for technological solutions for disinfection due to growing disposable income and new product launches are driving the growth of the market. For instance, in May 2020, Godrej Security Solutions (GSS) launched UV case which uses UV-C light disinfection technology to kill more than 65 families of pathogens, viruses and bacteria, including SARS-CoV-1. Furthermore, increasing adoption in hospitals, clinics, offices, malls and other places are expected to fuel the demand in coming years. However, lack of awareness regarding UV sterilizer pouches may hamper the growth during forecast period.

Asia Pacific, North America, Europe, Latin America, and Rest of the World are considered for the regional analysis of the global UV Sterilizer Pouch Market. North America is the leading region across the world in terms of market share due to high standard of living and high average household income. Whereas Asia Pacific is anticipated to exhibit the highest growth rate over the forecast period 2021-2027 due to growing awareness about hygiene issues and low cost of the product.
