Global Uveitis Therapeutics Market is valued approximately at USD 0.53 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.8% over the forecast period 2021-2027. Uveitis treatment is used to cure the middle layer of tissues in the eyewall uvea. Various type of drugs is used in the treatment of Uveitis such as cycloplegic agents, anti-inflammatory, antimicrobial drugs, immunotherapy & targeted therapies, and others are used in treatment of uveitis. The market growth is driven by the key factors such as rise in awareness among patient population adopting advanced therapeutics and increased R&D efforts for the discovery of novel medicines. For instance, EyePoint Pharmaceuticals, Inc. received FDA clearance for YUTIQ, an implant used to treat non-infectious uveitis in the posterior segment of the eye, in 2018. Furthermore, With growing cases of infectious diseases, the prevalence of uveitis with infectious etiologies is also rising. The majority of cases occur in underdeveloped nations. According to the Indian Journal of Inflammation Research, infections cause roughly half of all uveitis cases in India. Infectious etiologies are also a major cause of ocular inflammation in developing nations. However, Steep prices of medications and side effects of the medication may impede market growth over the forecast period of 2021-2027.

North America is dominating the market growth of uveitis treatment, due to the early approval of pipeline drugs as compared to other regions.
