Global V2X Cyber Security Market is valued at approximately USD2.02 billion in 2022 and is anticipated to grow with a healthy growth rate of more than 18.9% during the forecast period 2023-2030. V2X cybersecurity is the measures and technologies implemented to safeguard Vehicle-to-Everything (V2X) communication systems, ensuring the integrity, confidentiality, and availability of data exchanged between vehicles, infrastructure, and other entities. It involves protecting against cyber threats, vulnerabilities, and unauthorized access to interconnected automotive networks, enhancing overall system resilience and safety. The Global V2X Cyber Security Market is continuously growing due to factors such as digitalization in the automobile industry and rising cyber-attacks on vehicles.

Due to a rapid increase in cyber threats and cyber-attacks, the demand for V2X Cybersecurity has gradually increased. According to the Computing Technology Industry Association, fraud cases have increased by 70% since 2020. Additionally, in 2021, the cost of a healthcare data breach event averaged USD 10.1 million. This led to a sudden increase in the demand for V2X Cybersecurity due to the growing reliance on connected vehicle technologies and the escalating risk of cyber threats targeting critical

automotive systems. Moreover, the adoption of Vulnerability Assessment and Penetration Testing (VAPT) and training and Awareness Programs are the opportunities for Global V2X Cyber Security Market that led to the market growth. However, the complexity as well as the Interoperability and evolution of cyber threats stifle market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global V2X Cyber Security Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. North America dominated the market in 2022 owing to factors such as rapid technological advancements in the automotive sector, supportive government initiatives for smart transportation systems and significant sales of autonomous cars. Latin America is expected to grow significantly over the forecast period, owing to factors such as the increasing number of cybercrimes, continuously rising cyber crimes and the region's expanding digital penetrations that led to the market growth of the V2X Cyber Security Market globally.
