Abstracts

Global Vacuum Skin Packaging Market is valued at approximately USD 25.73 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.6% over the forecast period 2022-2029. Vacuum skin packaging is basically referred to as the process of removing the air from any package before any specified product is expected to be sealed either manually or automatically. Vacuum skin packaging is usually used for perishable products, primarily for fish & meat. Vacuum skin packaging aids in enhancing the shelf life of particular products. Vacuum skin packaging decreases the need for preservation and further offers clear packaging that emphasizes the product. The key factors driving the market growth are rising need for safe and hygienic packaging methods, rapid economic growth of countries and rising consumption of meat and poultry products.

According to Statista, in 2015, the consumption of poultry meat in India was 3,283.7 thousand metric tons, and the number reached 4,107 thousand metric tons in 2021. As a result, rise in poultry meat consumption would create a lucrative demand for the market. Also, growing government policies regarding food safety would create lucrative growth opportunities for the market during forecast period. However, the fluctuating prices of raw materials stifle market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Vacuum Skin Packaging Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia

Pacific dominated the market in terms of revenue, owing to the growing population, increasing demand for packaged food products, and growing industrialization in developing economies are anticipated to propel the market in the region. North America is expected to grow with the highest growth rate during the forecast period, owing to factors such as growing demand for packaged food products and rising consumption of meat and poultry products that would create lucrative growth prospects for the global Vacuum Skin Packaging Market across the North America region.
