## **Abstracts**

Global Vermicompost Market to reach USD XX billion by 2025.

Global Vermicompost Market valued approximately USD XX billion in 2017 is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2018-2025. The Vermicompost Market is continuously growing in the global scenario at significant pace. Vermicomposting is a type of composting in which certain species of earthworms are used to enhance the process of organic waste conversion and produce a better end-product. It is a mesophilic process utilizing microorganisms and earthworms. Earthworms feeds the organic waste materials and passes it through their digestive system and gives out in a granular form (cocoons) which is known as vermicompost. Increasing demand due to the benefits of vermicompost over traditional composts and growing concerns towards environment safety are the substantial driving factors of the market across the world. The benefits of using vermicompost compared to compost produced through other methods include improved soil aeration, higher microbial activity, improved water-holding capacity and better plant root growth. These benefits are also promoting the demand of vermicompost. However, high maintenance cost of vermicompost and it is a time-consuming process are the factors that limiting the market growth of vermicompost during the forecast period. The regional analysis of Global Vermicompost Market is considered for the key regions such as Asia Pacific,

North America, Europe, Latin America and Rest of the World.
