Moreover, veterinary care spending has expanded by around 7.0% and reached USD 30.2 billion in 2019. The number of livestock animals worldwide has been increasing rapidly in the course of recent years. growing demand for animal proteins and quality foods is propelling the market for better diagnosis and treatment for livestock. As indicated by India's animal census, the livestock population increased by 4.6% from 512.0 million in 2012 to 536.0 million in 2019. However, decline in growth due to the aftermath of COVID-19 and the directives involved since then impedes the growth of the market over the forecast period of 2021-2027. Also, advancement in veterinary anesthesia devices is likely to increase the market growth during the forecast period.
