## **Abstracts**

Global Veterinary Infusion Pumps Market is valued at approximately USD XXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XXX% over the forecast period 2022-2029. Veterinary Infusion Pumps are infusion pump, which acts as a diagnostic tool that administers fluids into a patient's body in controlled quantities, thereby including nutrients and medications. The Veterinary Infusion Pumps market is expanding because of factors such as increasing animal health expenditure and rising animal diseases and other surgical procedures. The market is dominated by Heska Corporation, Jorgensen Laboratories, Kent Scientific Corporation, Mediaid Inc and others.

According to a November 2021 IntechOpen Journal article titled "Epidemiology of Bovine Mastitis and Its Diagnosis, Prevention, and Control," mastitis is inflammatory of the mammary gland that causes discomfort to linger in either or both mammary glands and is a highly prevalent disease in cows. Additionally, it said that buffaloes owned by both rural and urban dairy farmers in India had an incidence of clinical mastitis of almost 18.74%. Additionally, there was a greater rate of subclinical mastitis; in the Indian state of Madhya Pradesh, this rate reached nearly 47.9%. Due to the increasing use of infusion pumps to administer medication to animals during therapy, the market is growing as a result of the disease's high burden. However, high pet care costs and increasing number of new entrants in the market may halt market growth.

The key regions considered for the Global Veterinary Infusion Pumps Market study

include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the space in terms of revenue, rising animal diseases and growing pet adoption in the region. The North American Pet Health Insurance Association reports that the yearly base cost for dogs and cats in 2021 will be USD 458 for dogs and USD 201 for cats. Due to the high cost of a pet and the growing attention being paid to pets' health, veterinary infusion pumps will be employed during procedures. Asia Pacific is expected to grow significantly during the forecast period, owing to rising animal expenditure.
