Abstracts

Global Veterinary X-ray Market is valued approximately USD 0.68 Billion in 2019 and is anticipated to grow with a healthy growth rate of more than 6.40% over the forecast period 2020-2027. These x-ray radiations are then used in the healthcare and surgical industries for medical diagnosis and procedures including catheter placement.

Veterinary X-ray devices are used to diagnose diseases in animals and are referred to as X-ray machines. Rise in companion animal population is the major factor driving the growth of veterinary x-rays market. For instance, as per national pet owners survey conducted by the American Pet Product Association (APPA), 2019-2020, over 67% of US households or about 85 million families in United States own a pet which is up from 56% from 1988. It includes total of 5.7 million birds, 42.7 million cats, 63.4 million dogs and about 11.5 million freshwater fish etc. Also, as per survey by People's Dispensary for Sick Animals (PDSA) animal Wellbeing (PAW), 2019, over 50% of United Kingdom adults own a pet out of which over 24% of UK adults own cat, 26% of adults own dogs and over 2% of adults own rabbits. The ownership of cat in UK increased to 10.9 million in 2019 from 10.3 million in 2017 and similarly dog's ownership rose to 9.9 million in 2019 from 9.3 million in 2017. However, increasing pet care cost and high cost of instruments & procedures is the major factor restraining the growth of market.

The regional analysis of global Veterinary X-ray market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the rising animal health expenditure and growing demand for pet insurance, increasing number of veterinary practitioners and growth in companion animals. Whereas Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2020-2027. Factors such as rising demand for pet insurance with growing animal health expenditure would create lucrative growth prospects for the Veterinary X-ray market across Asia-Pacific region.
