Global Vibrating Conveyor Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. A vibration conveyor is a device type that uses vibrations to transport objects. This device matter forward through vibrations in the same direction as the traveling motion instead of vertical vibrations. Factors such as surging demand for electrical drives, rising availability of energy-efficient conveyors with auxiliary power generation capability, coupled with the flourishing development of the pharmaceutical industries are driving the market growth around the world.

According to the Statista report, the global pharmaceutical sector was estimated to value at USD 1204.8 billion in 2018, which reached USD 1423.5 in 2021. Likewise, the rising investment in pharmaceutical research and development is projected to reach USD 254 billion by 2026. Thereby, the growth of the pharmaceutical sector is propelling the demand for vibrating conveyors because of rising drug development projects and the construction of new manufacturing units. In addition, growing investment in R&D activities, as well as the introduction of technologically advanced products are creating lucrative opportunities for market growth in the forthcoming years. However, the dearth

of skilled professionals and lack of awareness among the population stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Vibrating Conveyor Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. The Asia Pacific dominated the space in terms of revenue, owing to the rising industrialization, thriving growth of the end-use industries, along with the development of major emerging economies such as India and China. Whereas, Europe is expected to grow significantly during the forecast period. Factors such as growing investment in the manufacturing sector and rising demand for technologically advanced products are burgeoning the market growth in the forecasting years.
