Abstracts

Global Video Banking Service Market is valued at approximately USD 71.4 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 13.6% over the forecast period 2022-2029. Video Banking Service refers to remote banking services offered by the bank and financial institutions via video connectivity. These facilities can be accessed by customers by visiting the bank's website and application. Moreover, there are benefits associated with video banking services such as convenient and personal experience for customers, and low operations cost for the banks and financial institutions. The outbreak of covid 19 forced banks and financial institutions to roll out virtual banking services, making a positive impact on the growth of the Global Video Banking Service Market. The increasing demand for personalized banking services and growing expansion of the BFSI Industry as well as strategic initiatives from leading market players are key factors accelerating the market growth.

The rising expansion of the global banking, finance, and insurance sector is contributing to the growth of the Global Video Banking Service Market. For instance, according to Statista – as of 2022, the revenue in the US Banking, Finance & Insurance sector is valued at USD 3.72 trillion in 2022, and the BFSI sector is projected to grow at an annual growth rate of 2.47% between 2022-2025 period to reach to USD 4 trillion by 2025. Moreover, in February 2022, the Ministry of Finance, Government of India announced the establishment of 75 digital banking units (DBUs) across 75 districts across India. In addition, under this plan in October 2022, ICICI Bank and Kotak Mahindra Bank have opened their DBUs in Kohima, Nagaland, and Mehsana, Gujrat.

Also, the rapid growth of digital banking services and increasing investment from authorities in remote banking would create a lucrative growth prospectus for the market over the forecast period. However, security and privacy concerns and limited availability of high-speed internet services stifle the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Video Banking Service Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the increasing introduction of Video Banking Services from leading banks and the availability of high-speed internet infrastructure in the region. Whereas Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as the rising adoption of smartphones, and favourable initiatives from government authorities to promote digital banking services coupled with the growth of high-speed internet services in the region.

Major market player included in this report are:

AU Small Finance Bank Limited

Barclays

Glia Technologies, Inc.

Guaranty Trust Bank Limited.

NatWest International
