Global Video Communication Platform as a Service (PaaS) Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028.

Video Communication Platform as a Service (PaaS) can be defined as a cloud-based solutions that facilitates the user to insert voice, video, and message-based communications to business applications. Video PaaS service provider delivers a platform to customers over the cloud and this platform facilitates the organization to develop, run, and manage business applications without the need to build and maintain the infrastructure on its own. Video PaaS offers several advantages including fast and low-cost deployment, provide access to latest hardware & operating systems, and platform support among others. The rising adoption of cloud-based services worldwide and increasing demand for video PaaS across different industries as well as recent product announcements from leading market players are factors that are accelerating the global market demand. For instance, according to Statista – during 2021, end user spending in public cloud market worldwide was estimated at USD 410 billion and the spending is projected to grow to around USD 600 billion by 2023. Furthermore, leading

market players are working towards new product announcements to capitalize the growing adoption of Video Communication Platform as a Service (PaaS) solutions. For instance, in October 2021, Bharti Airtel rolled out its video platform as a service (VPaaS) named Airtel IQ Video. Airtel IQ Video is an end-to-end managed solution that offers different features including app development, content hosting, curation and lifecycle management and it also enables business to embed various communications such as voice, SMS, IVR and video in their applications. Moreover, in July 2022, Virginia, USA based provider of Enterprise Video Platforms Vbrick launched VPaaS platform for Developers. This new Vbrick platform offers a suit of APIs to add different video capabilities such as live webcasts, on-demand streaming, transcription, and translation among others to their existing applications. Also, growing adoption of 3D video conferencing and rising emergence of 5G technologies worldwide are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, security concerns associated with the cloud platforms impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Video Communication Platform as a Service (PaaS) Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World.
