Abstracts

Global Vinyl Ester Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Vinyl Ester is a resin which is produced by the esterification which is made of epoxy resin with acrylic or methacrylic acids. The rise in the installation of wind turbines, growth of marine industry and the demand from the emerging economies has led the adoption of Vinyl Ester across the forecast period. For Instance: as per the IRENA, the wind turbines installed in 2019 are 593,291 and this has increased up to 698,043 in the year 2020. Also, with the increasing the demand for FGD systems, the adoption & demand for Vinyl Ester is likely to increase the market growth during the forecast period. However, low shelf life of vinyl ester impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Vinyl Ester Market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the significant region across the world in terms of market share owing to the high demand from different industries in China, such as water & wastewater treatment, chemical, pharmaceutical, food processing, and transportation. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as high demand for temperature formulations would create lucrative growth prospects for the Vinyl Ester Market across Asia-Pacific region.
